PROJECT EXPO - C PROJECTS

"Unity is the strength... When there is teamwork and collaboration, wonderful things can be achieved."

A Two day **PROJECT EXPO** – C Projects was Organized by Department of **Information Technology** at **MallaReddy College of Engineering and Technology** on Jan 19th & 20th,2018 for Ist year IInd sem B.Tech students.

It was organized under guidance of **Dr. G.Sharada**, HOD **of Information Technology** and it was coordinated by **Associate Professor, Mr.P.Srinivas.** We extend our sincere thanks to **Dr.V.Madusudhana Reddy**, HOD of **Humanities & Sciences** who continuously supported us throughout the Program.

As we know that,"necessity is the mother of invention", So in today's Challenging world,every System is developed and launched by the use of Computer software and programming. Students learn C as their first programming language.They quickly become able to write programs that include functions, arrays and pointers, file handling and data structure, etc. Now students take up real life problems and see how they can solve them. Here students will use C Program to develop one real life project with a simple project life cycle using Turbo C. The proposal of the project has been prepared and is being submitted to the concerned Guides.
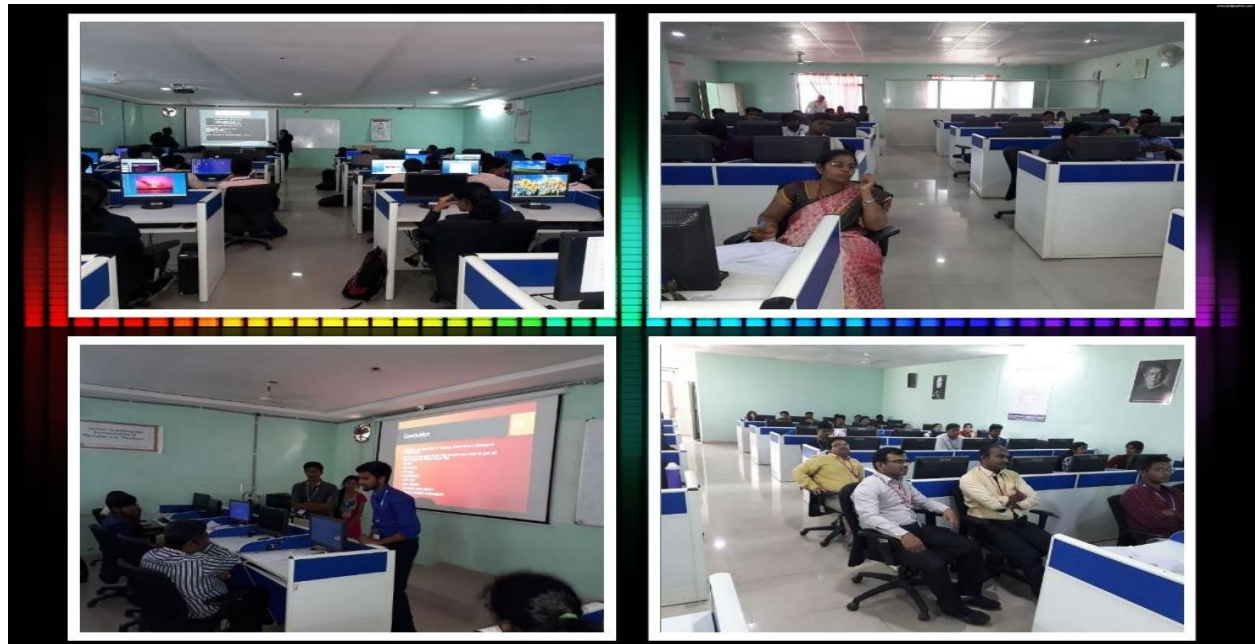

Students' academic success is evaluated by their performance in Projects Devlopment. The individual members of student teams typically contribute to the group project in a variety of ways. They post comments to discussion boards, send email messages, submit documents they created, and take part in team chat sessions.

Three Panels were scheduled for Monitoring the Projects.
